Postdoctoral Researcher, Università Cattolica del Sacro Cuore,
Milano

«Latin as Linked Open Data: the LiLa Knowledge Base»

Latin is a well-documented language with a wealth of lexical and textual resources available. However, despite this abundance, accessing and utilizing these resources effectively may be challenging, as they are often scattered and unconnected.

The LiLa:Linking Latin project integrates multiple corpora, lexica, and dictionaries for Latin on the Semantic Web, thereby enabling researchers to retrieve information from distributed resources without being hindered by differing data formats or annotation standards. LiLa was funded from the European Research Council with a Consolidator Grant to build an open-ended Knowledge Base using the Linked Data paradigm, continuously expanding its coverage as additional linguistic resources are being linked to it. The talk offers an overview of the LiLa Knowledge Base.

Dienstag, 13. Mai 2025

16:15 – 17.45 Uhr

RAG 105 (Rämistrasse 68, Zürich)

Dozierende, Studierende und weitere Interessierte sind herzlich
eingeladen.

Prof. Dr. Anke Walter und Prof. Dr. Carmen Cardelle

In Zusammenarbeit mit

ZAZH – Zentrum Altertumswissenschaften Zürich, UZH
